PROFESSIONAL EXPERIENCE

I am a Flutter application developer focused on building elegant and scalable user interfaces, with strong attention to performance and user experience. I have experience in state management using Bloc and Cubit and provider, and I rely on clean architecture to ensure code quality and maintainability. I excel at integrating with servers via REST APIs and pay close attention to design details such as shadows, shapes, and animations. I enjoy teamwork, prioritize professional documentation, and continuously strive to improve my skills and join professional teams—whether remotely or within a company.

TECHNICAL SKILLS

Programming Languages

- Dart
- Php
- Java Script
- Html
- Css
- Sql

Frameworks

- **Frontend :** Flutter
- **Backend :** Laravel
- **State Mangement:** Bloc ,Cubit ,Getx
